(54) Title: AIRFOIL LEADING EDGE VORTEX ELIMINATION DEVICE

(57) Abstract: A turbo-machine (40) having a vortex elimination device (56, 58, 74) disposed at the intersection of a blade (46) or vane (44) and its end wall (50, 54, 72). The vortex elimination device (56, 58, 74) may have a generally triangular shape with a straight (58) or curvilinear (56) leading edge and may be formed to be integral (56, 74) with or attached to (58) the airfoil (52, 70) and endwall (50, 54, 72). The vortex elimination device prevents the formation of a leading edge horseshoe vortex as the flow stream passes over the leading edge of the airfoil by generating a radial leading edge force that counters the radial equilibrium and stagnated flow forces, thereby providing a smooth flow stream around the airfoil leading edge.

INTERNATIONAL SEARCH REPORT

national Application No
PCT/US 00/07396

A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 F01D5/14

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 F01D

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	EP 0 661 413 A (MOTOREN TURBINEN UNION) 5 July 1995 (1995-07-05) column 1, line 32 -column 2, line 37; figures 1A,2,3,4	1-12

☒ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family

Date of the actual completion of the international search
